(54) Image printing system

(57) Image plus event information printing system, which comprises an image data inputting means for inputting a datum of original image, an event information database which memorizes the data of current and/or passing events information being sorted with one or more items, wherein one of the items consists of the occurrence time of the event, an event information retrieval means for extracting any event information within a pre-determined range being in correlation to the time which is related to the original image, by retrieving from the sorted data in the event information database with using one or more of the items, an image editing means for preparing a datum of an image plus event information, from the datum of original image and the extracted event information, and a printing means for printing the image plus current events information in accordance with the datum prepared by the image editing means.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

1-12

European Patent
Office

LACK OF UNITY OF INVENTION
SHEET B

Application Number

EP 01 30 7019

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-12

Printing system combining image and event information comprising a database to memorize event information data, a retrieving means for extracting any event information from the database, an image editing means for preparing a datum of an image plus event information, and a printing means for printing the image plus current events information in accordance with the datum prepared by the image editing means.

2. claims: 13-28

Dynamic-shot printing system, which comprises an input means, a static image data specifying means for specifying a scene recorded in the dynamic image data as the static image, an order inputting means, an output content designation data producing means for preparing an output content designation datum which records the image to be output and appendix conditions for the image on the basis of the obtained static image data and the input orders, and a printing means which prints out a printed article of the image in accordance with the output content designation datum.

3. claims: 29-34

Additional information printing system, which provides to a customer, when a printing system prints an image data on the request of this customer, a printed article containing additional information.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 01 30 7019

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on the European Patent. The European Patent Office is not liable for these particulars which are merely given for the purpose of information.
